Query 2

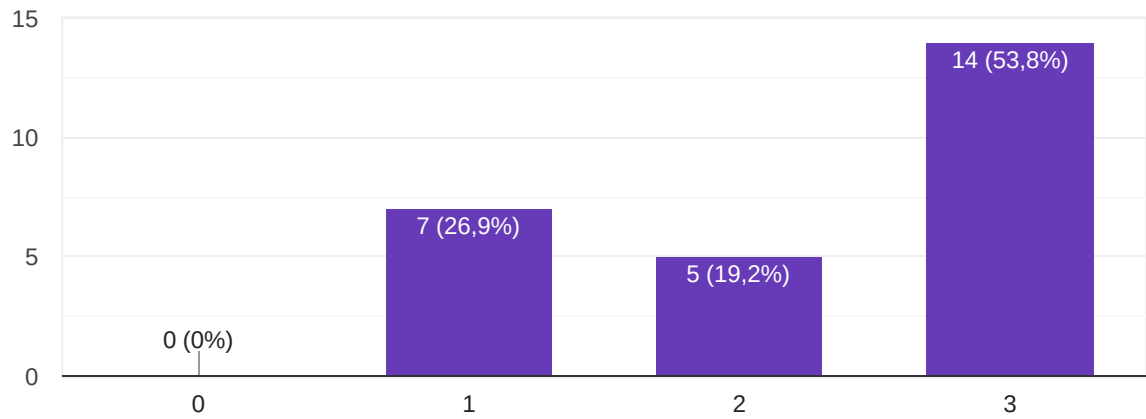

All the questions on this page refer to the above query

26 respostas

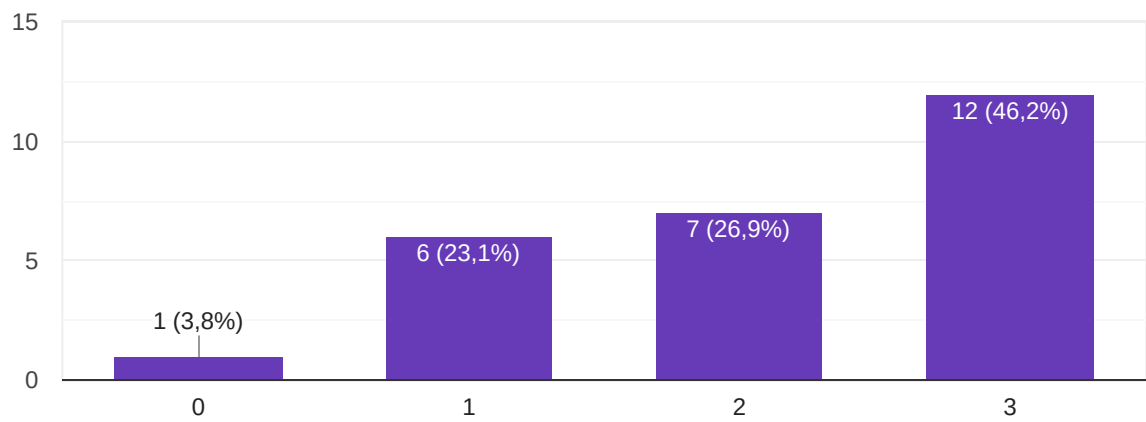

1. How relevant is the following code to the query "read*"?

26 respostas

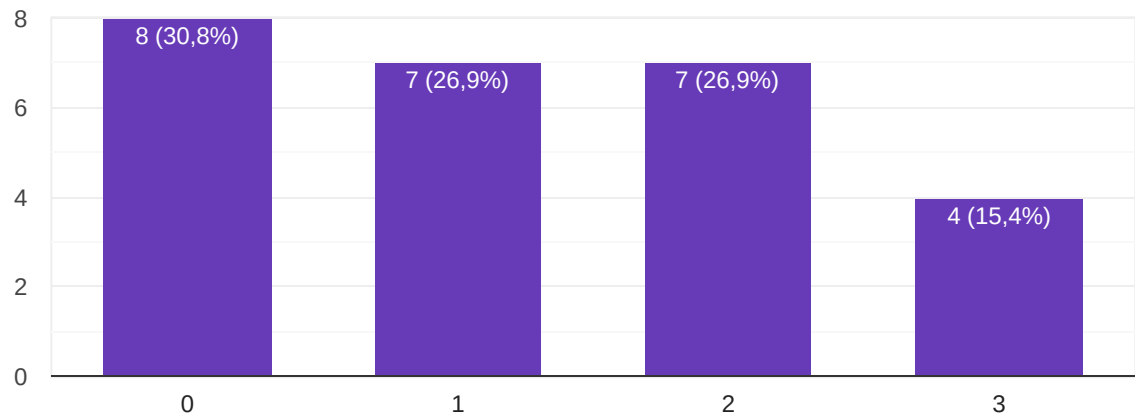

2. How relevant is the following code to the query "read*"?

26 respostas

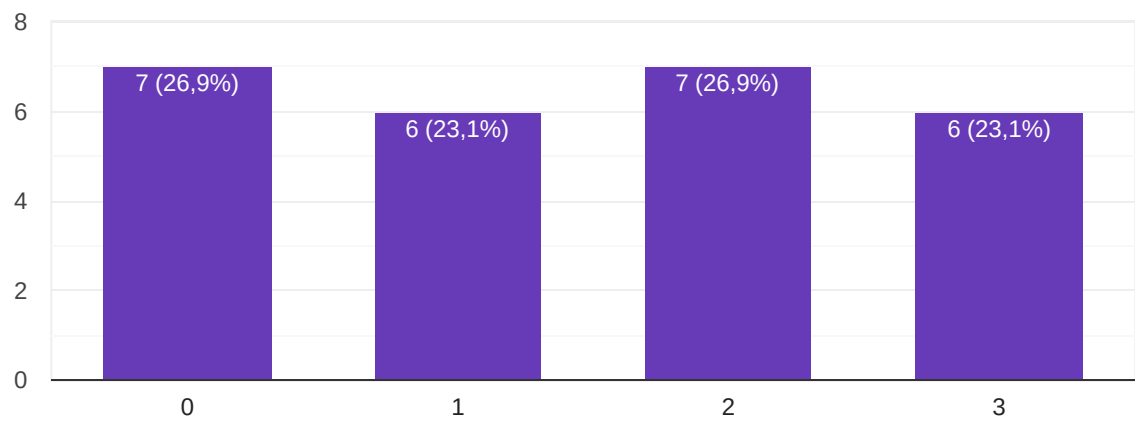

3. How relevant is the following code to the query "read"?

26 respostas

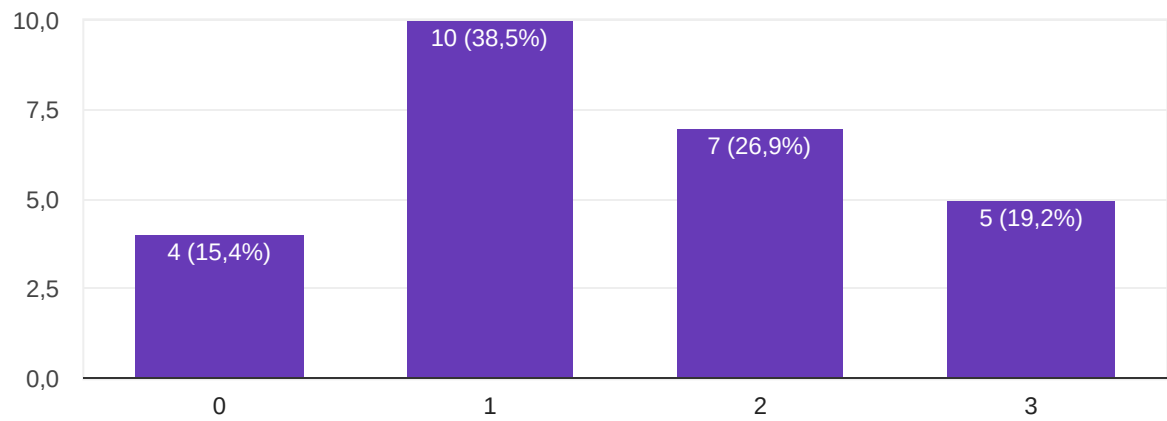

4. How relevant is the following code to the query "read"?

26 respostas

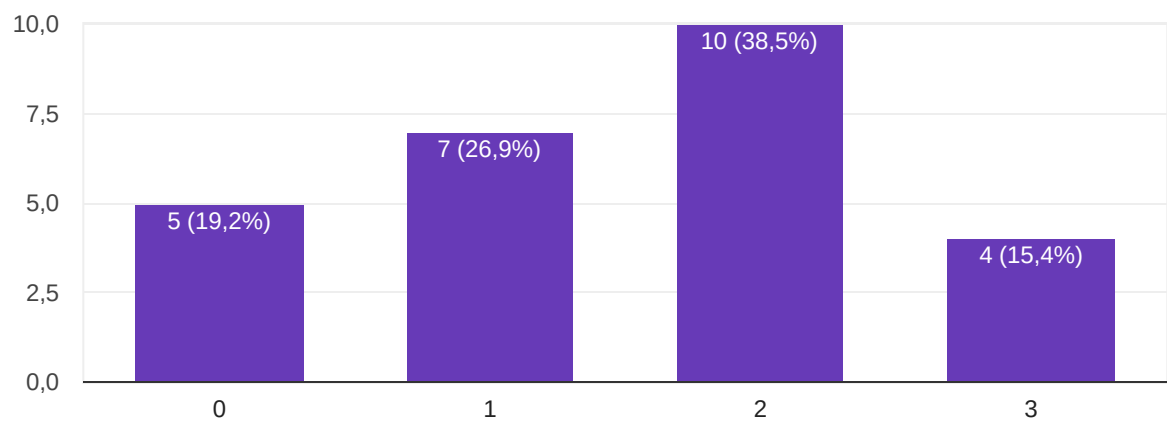

5. How relevant is the following code to the query "read"?

26 respostas

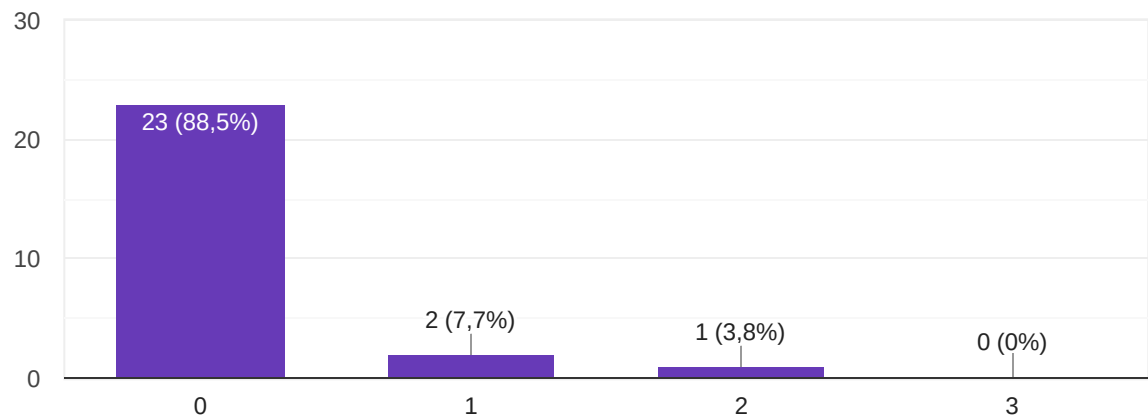

6. How relevant is the following code to the query "read"?

26 respostas

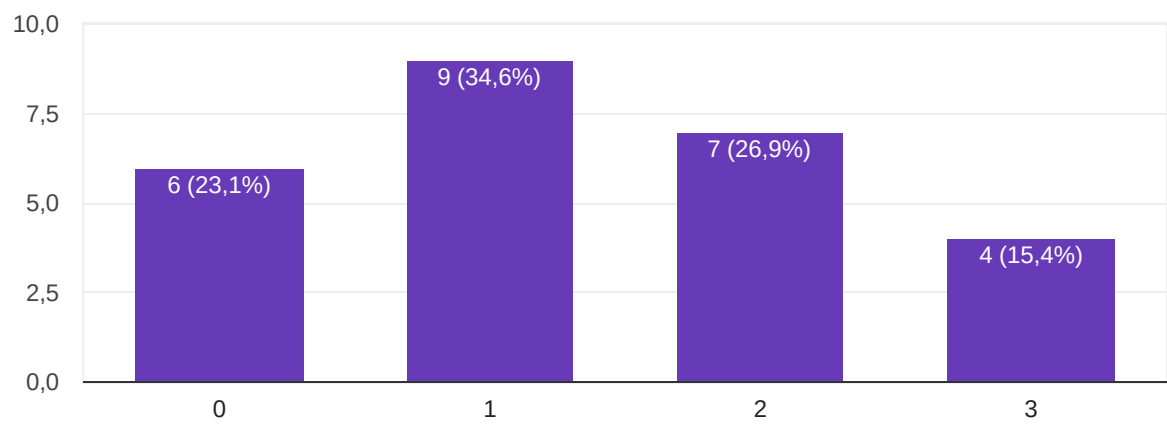

7. How relevant is the following code to the query "read"?

26 respostas

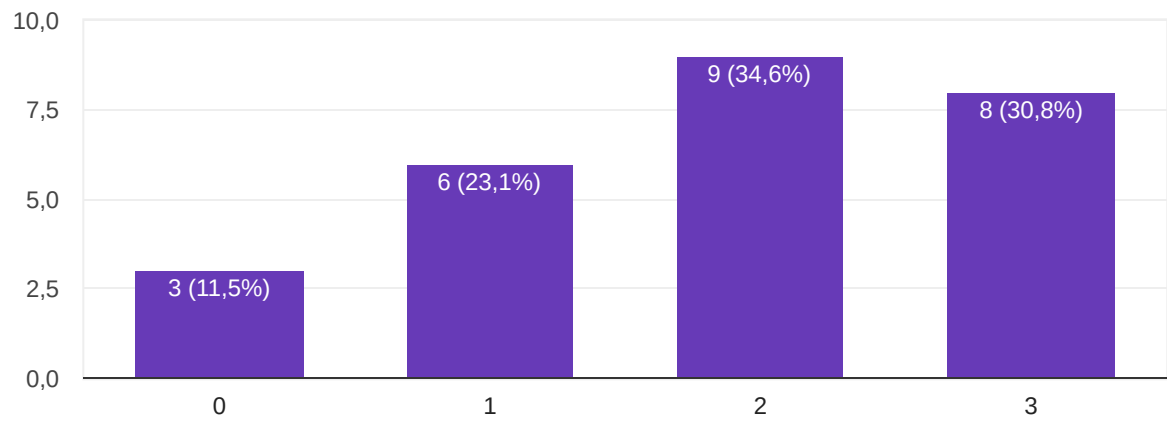

8. How relevant is the following code to the query "read"?

26 respostas

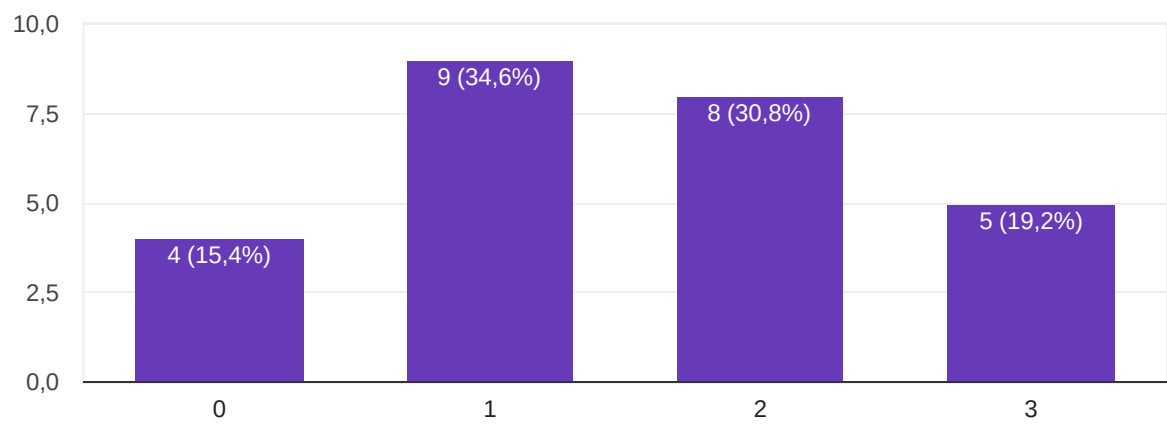

9. How relevant is the following code to the query "read"?

26 respostas

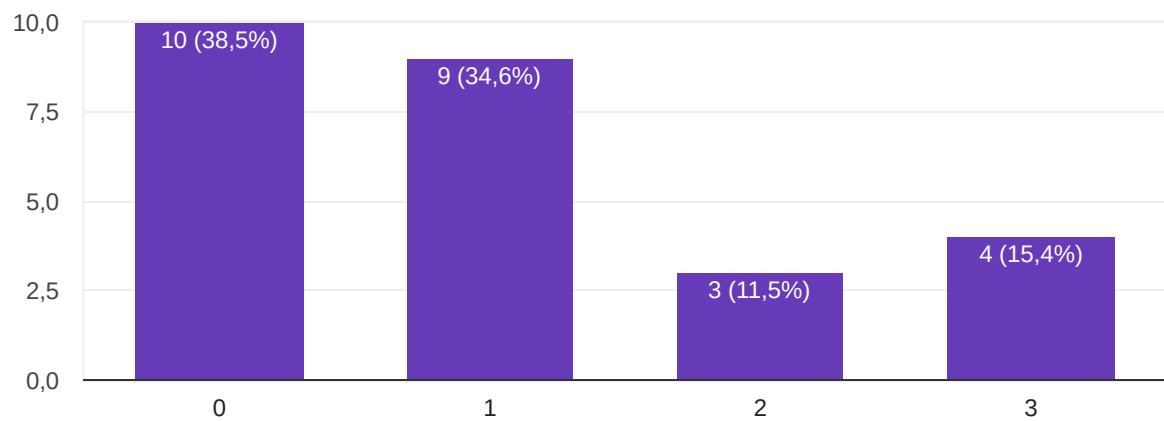

10. How relevant is the following code to the query "read"?

26 respostas

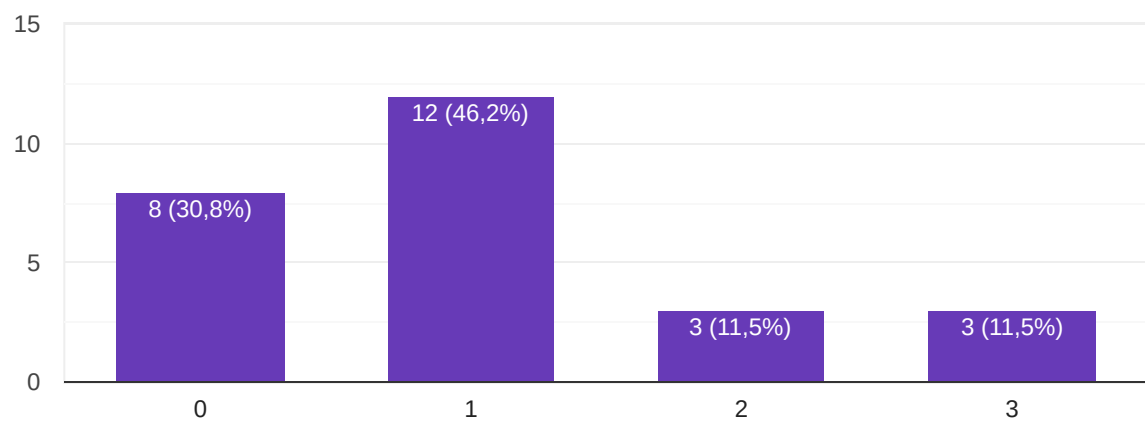

11. How relevant is the following code to the query "read*"?

26 respostas

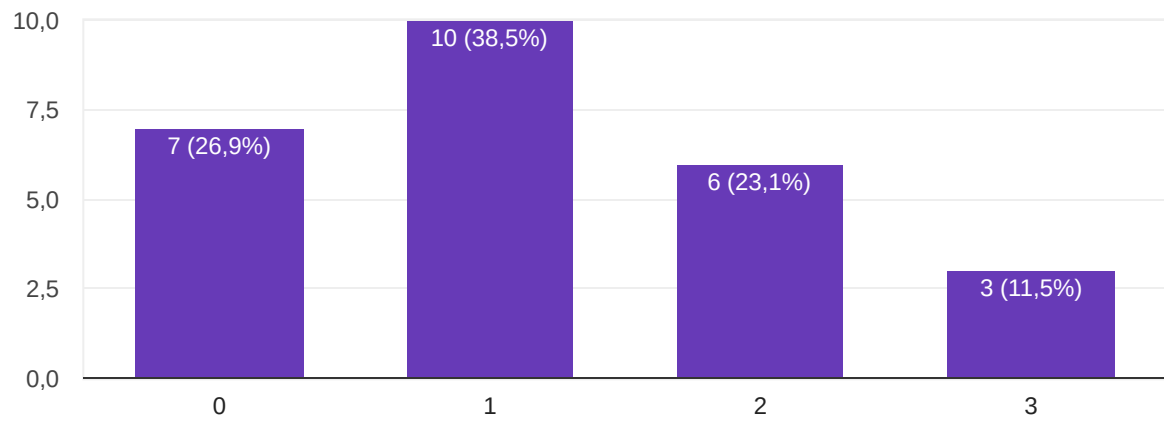

12. How relevant is the following code to the query "read*"?

26 respostas

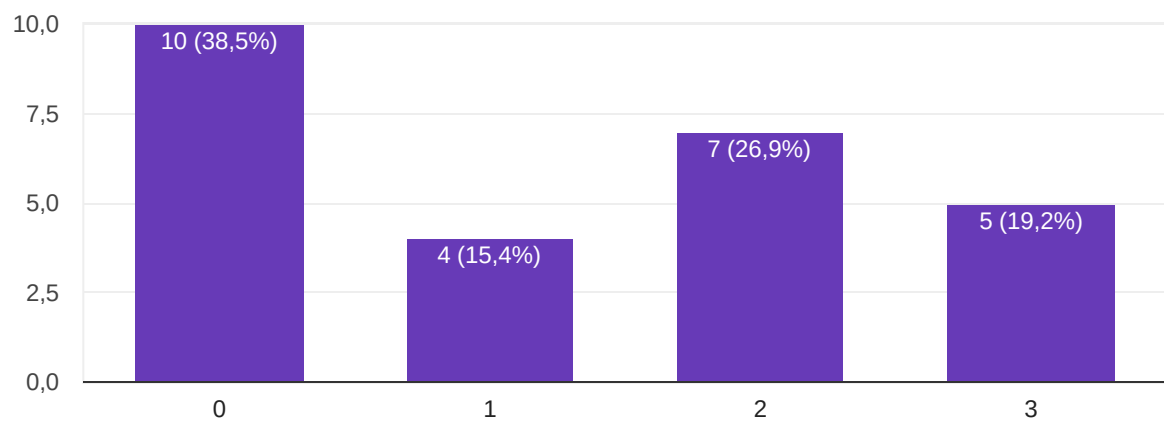

13. How relevant is the following code to the query "read"?

26 respostas

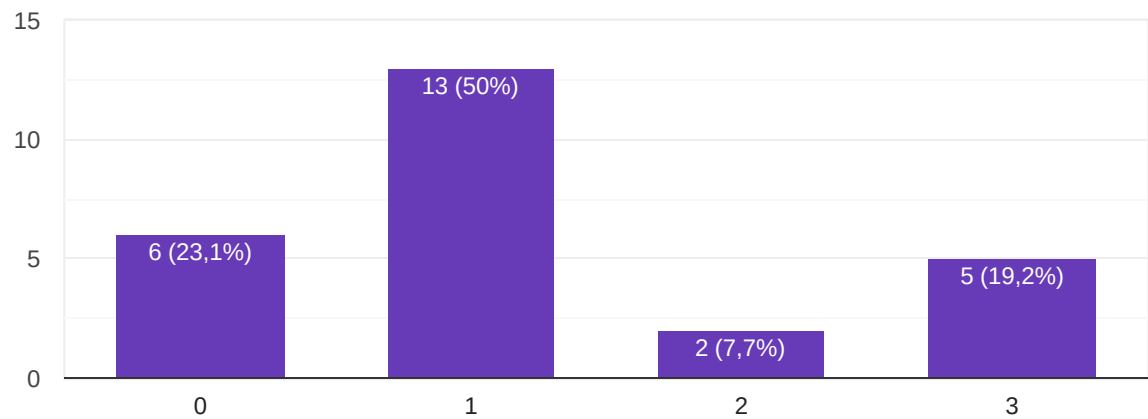

14. How relevant is the following code to the query "read"?

26 respostas

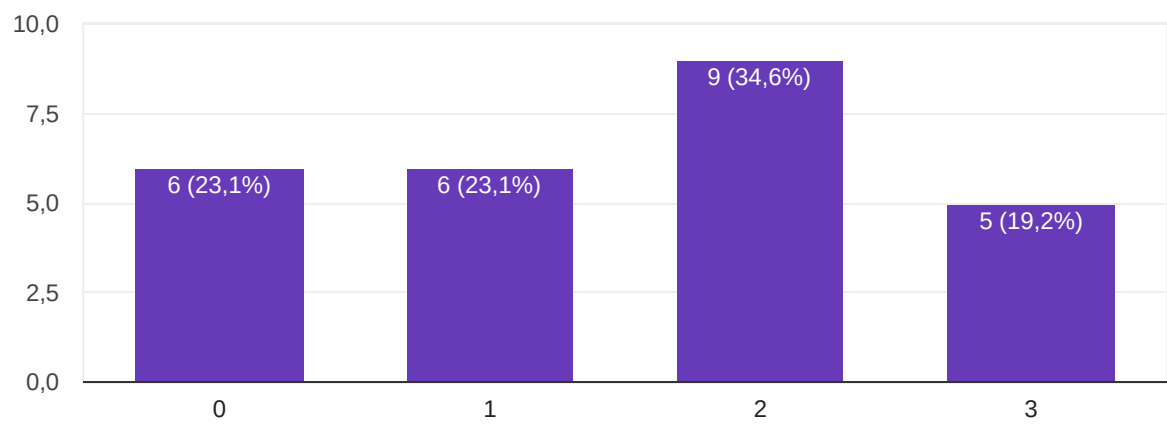

15. How relevant is the following code to the query "read"?

26 respostas

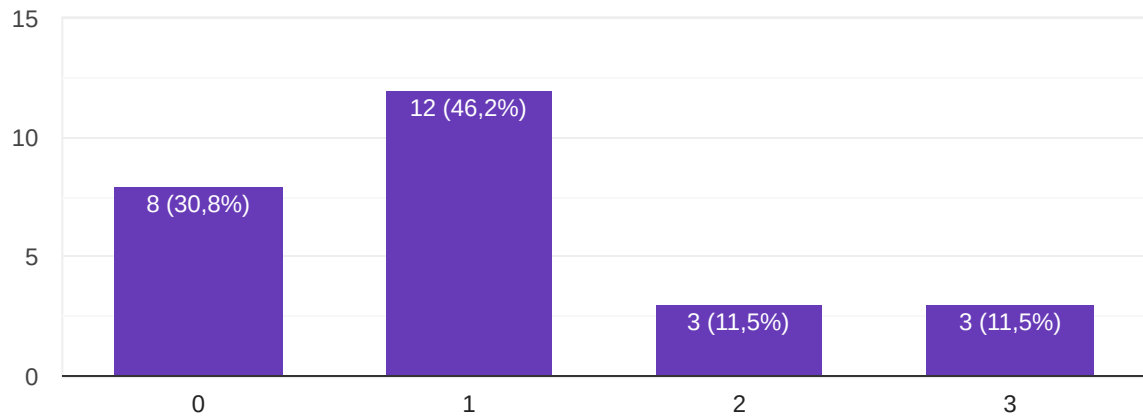

16. How relevant is the following code to the query "read"?

26 respostas

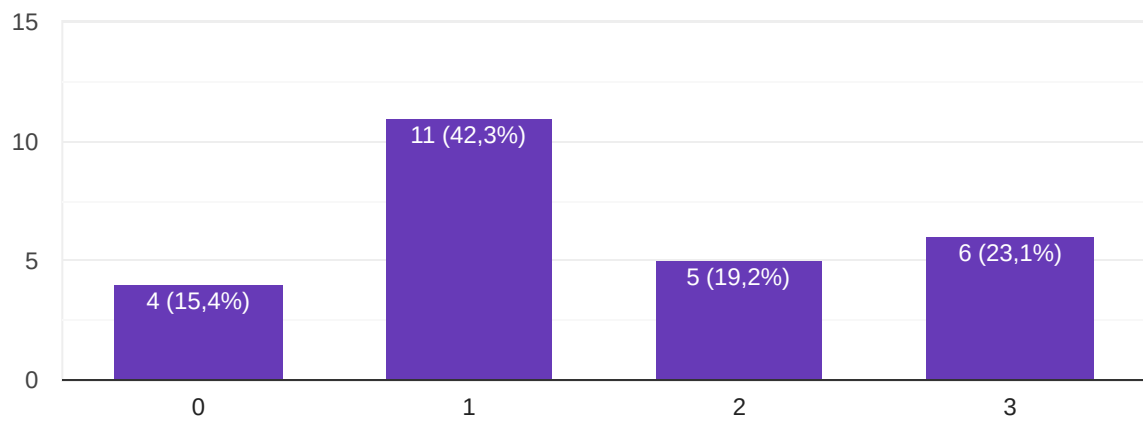

17. How relevant is the following code to the query "read*"?

26 respostas

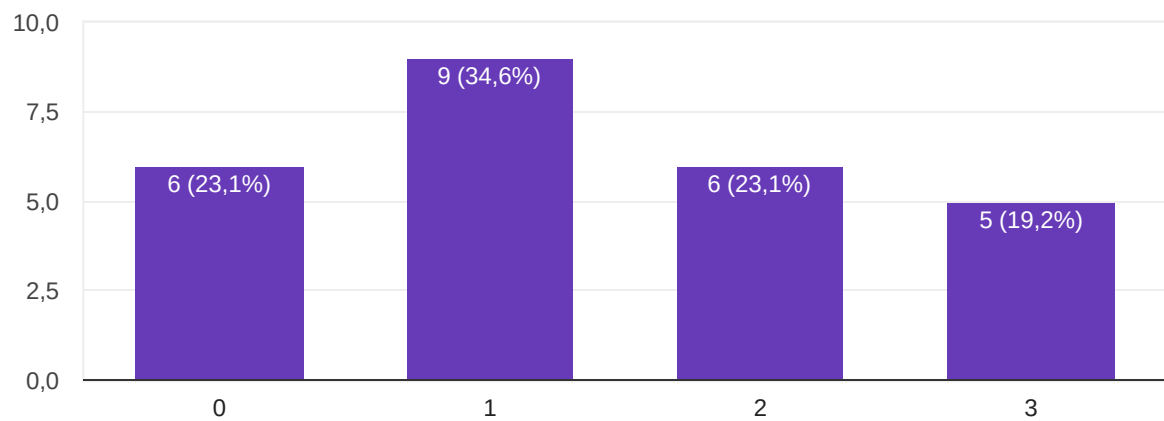

18. How relevant is the following code to the query "read*"?

26 respostas

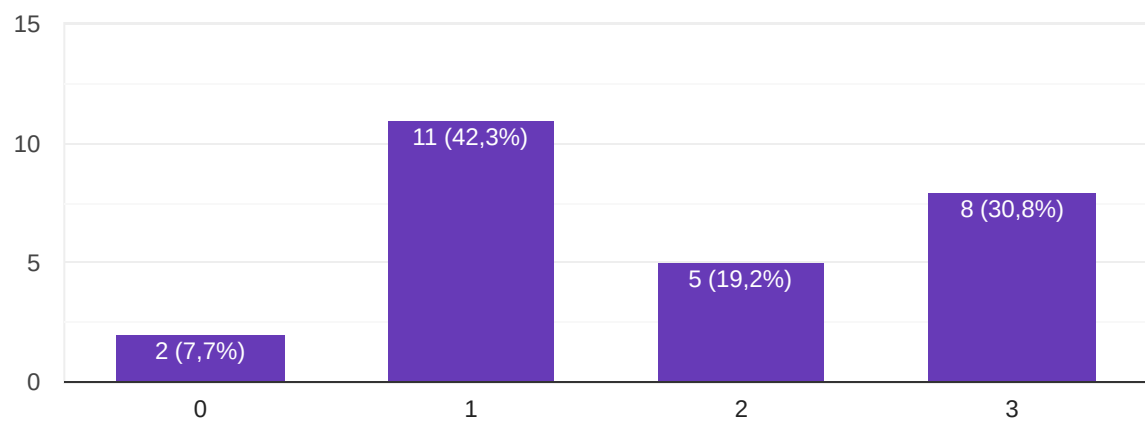

19. How relevant is the following code to the query "read*"?

26 respostas

20. How relevant is the following code to the query "read*"?

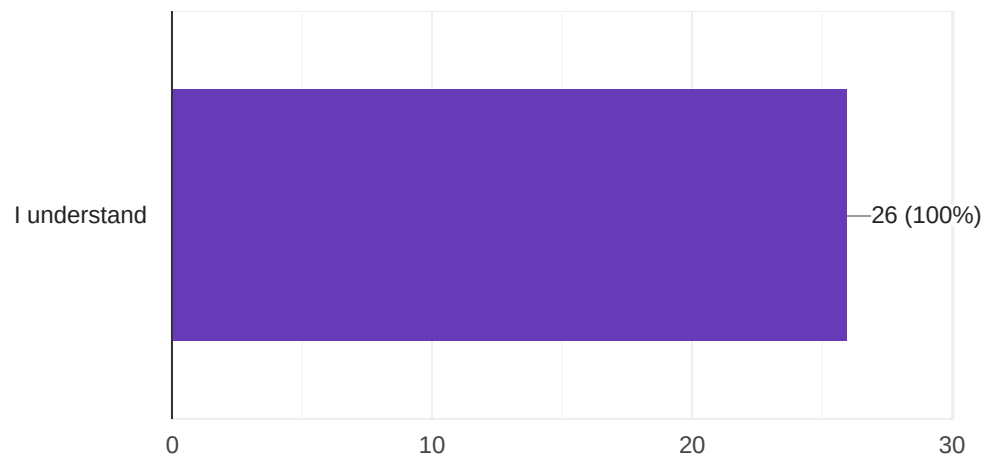

26 respostas

Query 3

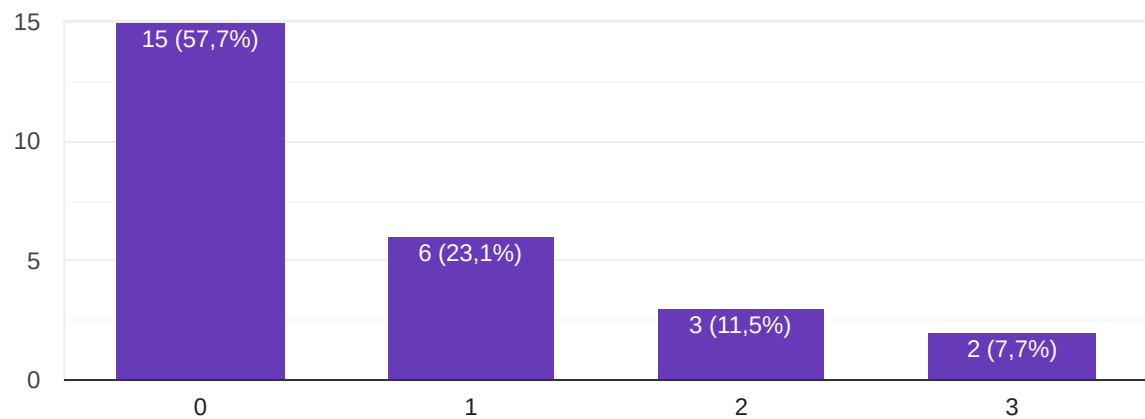

All the questions on this page refer to the above query.

26 respostas

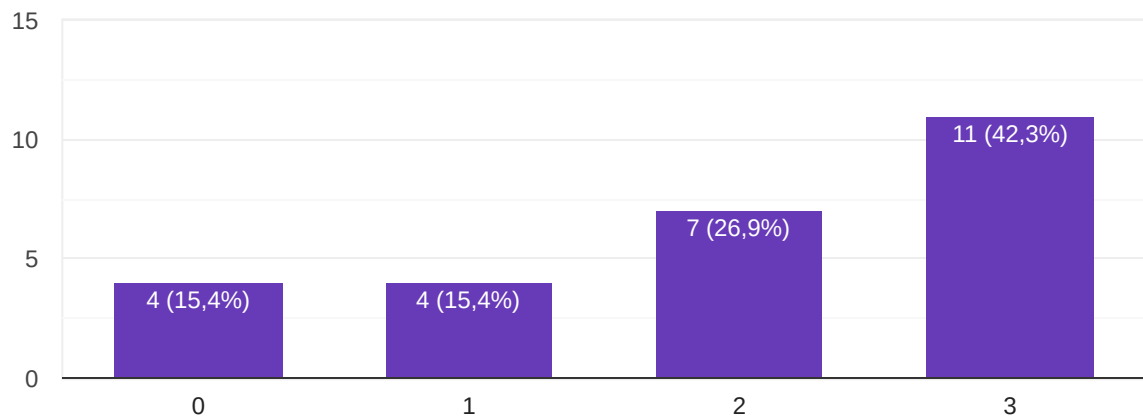

1. How relevant is the following code to the query "max*" with arguments type: "int" and return type "int".

26 respostas

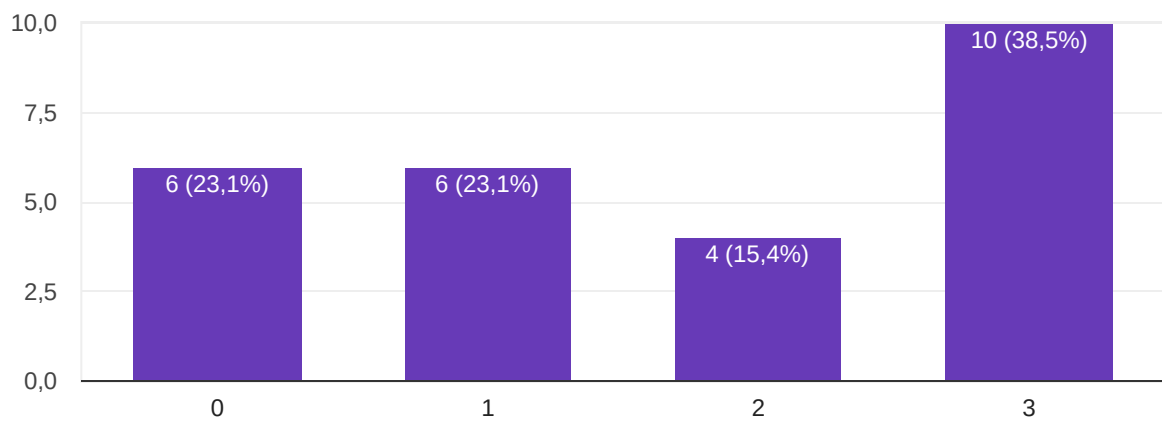

2. How relevant is the following code to the query "max*" with arguments type: "int" and return type "int".

26 respostas

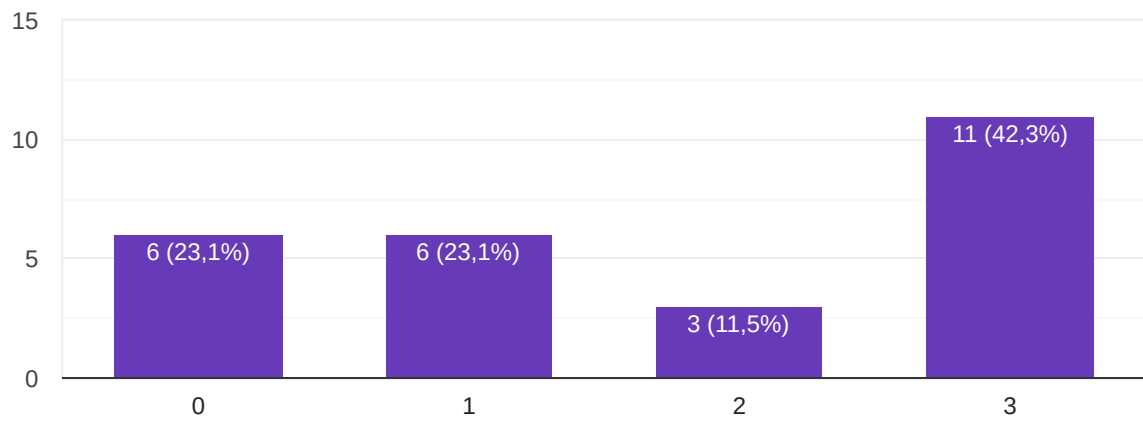

3. How relevant is the following code to the query "max*" with arguments type: "int" and return type "int".

26 respostas

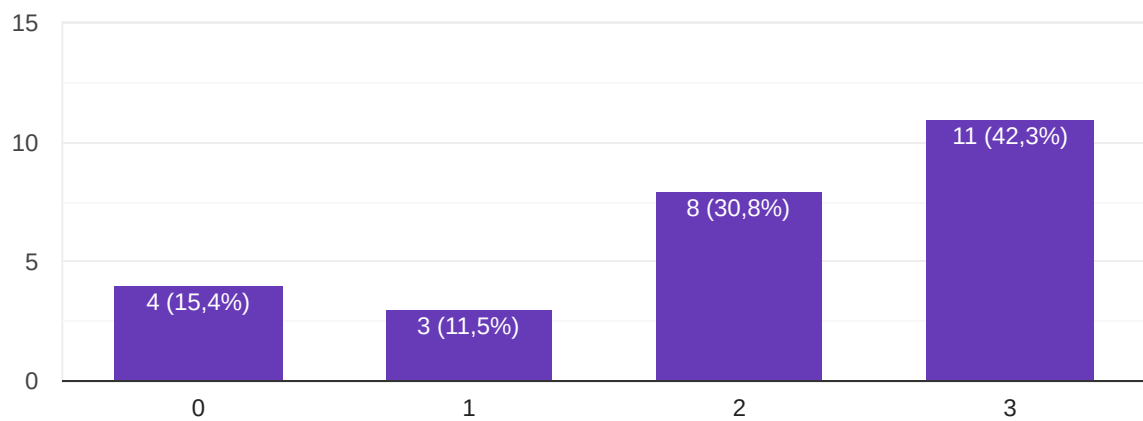

4. How relevant is the following code to the query "max*" with arguments type: "int" and return type "int".

26 respostas

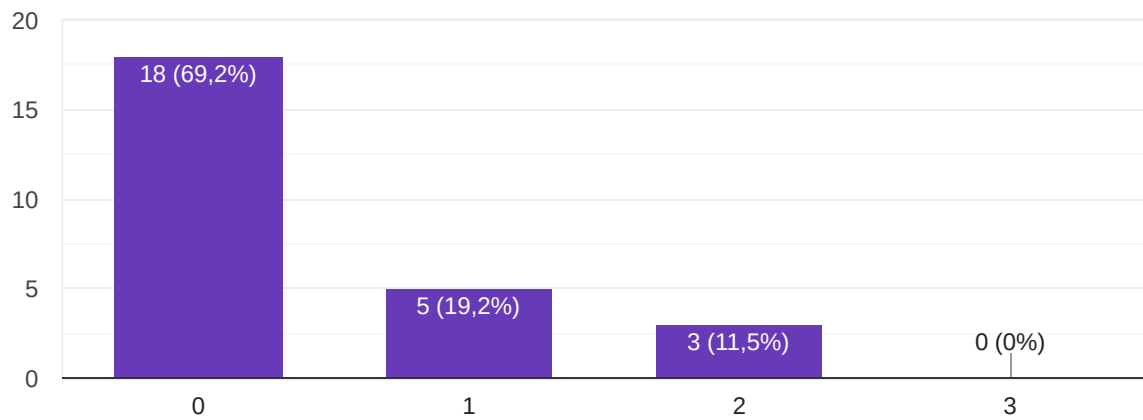

5. How relevant is the following code to the query "max*" with arguments type: "int" and return type "int".

26 respostas

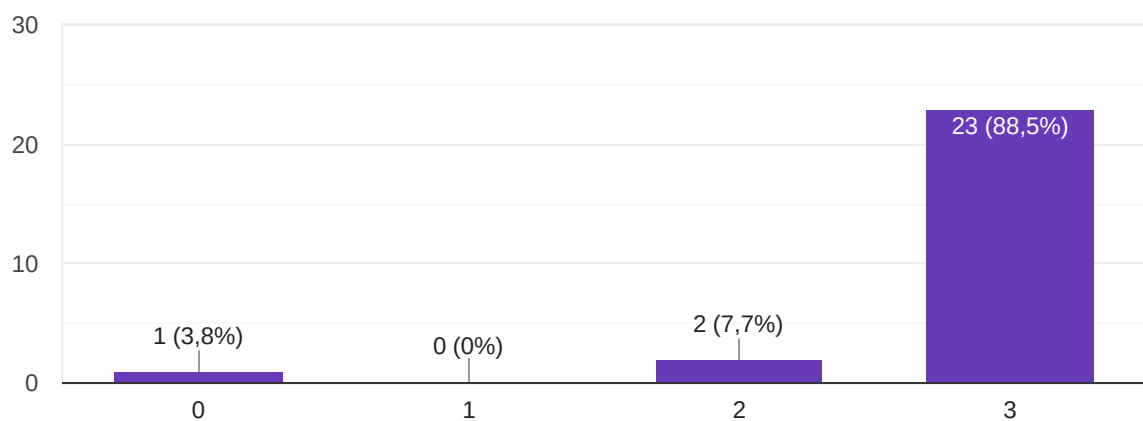

6. How relevant is the following code to the query "max*" with arguments type: "int" and return type "int".

26 respostas

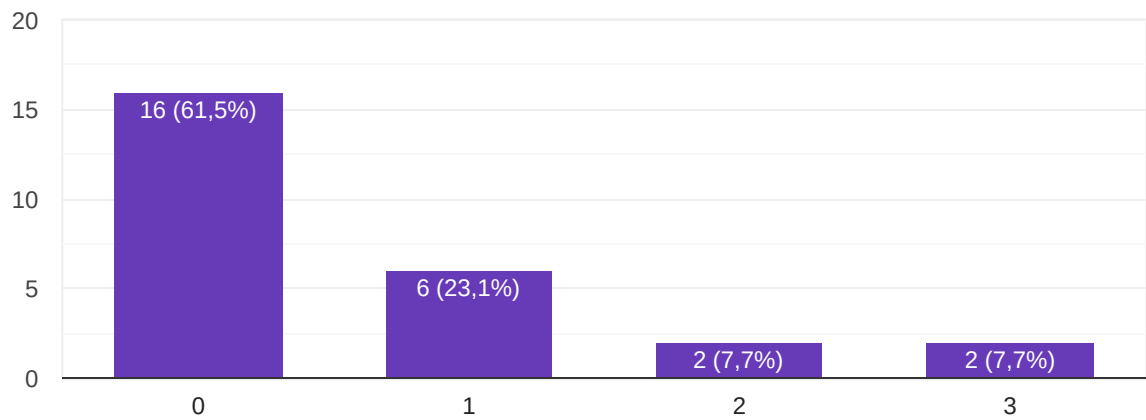

7. How relevant is the following code to the query "max*" with arguments type: "int" and return type "int".

26 respostas

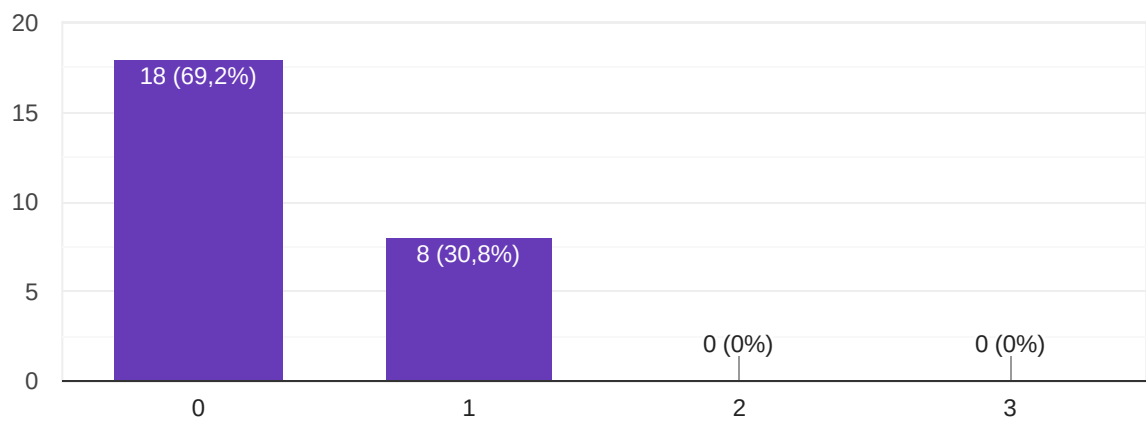

8. How relevant is the following code to the query "max*" with arguments type: "int" and return type "int".

26 respostas

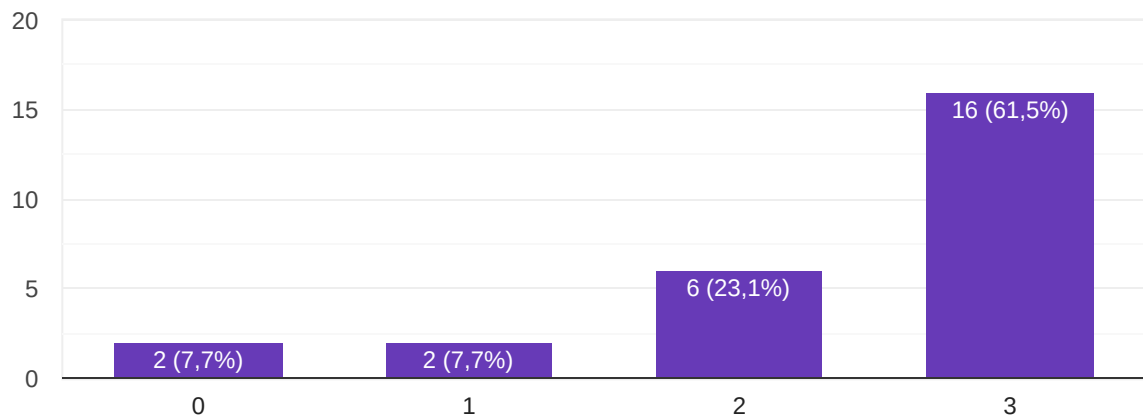

9. How relevant is the following code to the query "max*" with arguments type: "int" and return type "int".

26 respostas

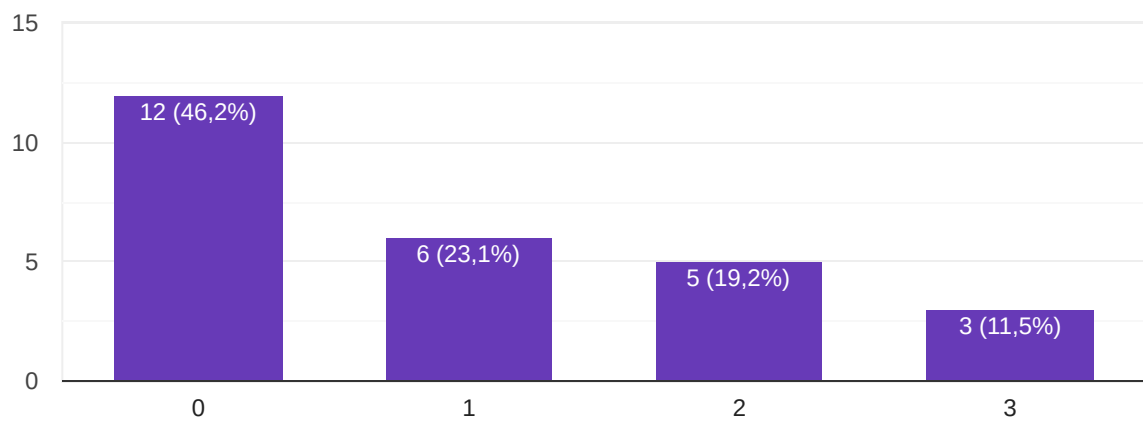

10. How relevant is the following code to the query "max*" with arguments type: "int" and return type "int".

26 respostas

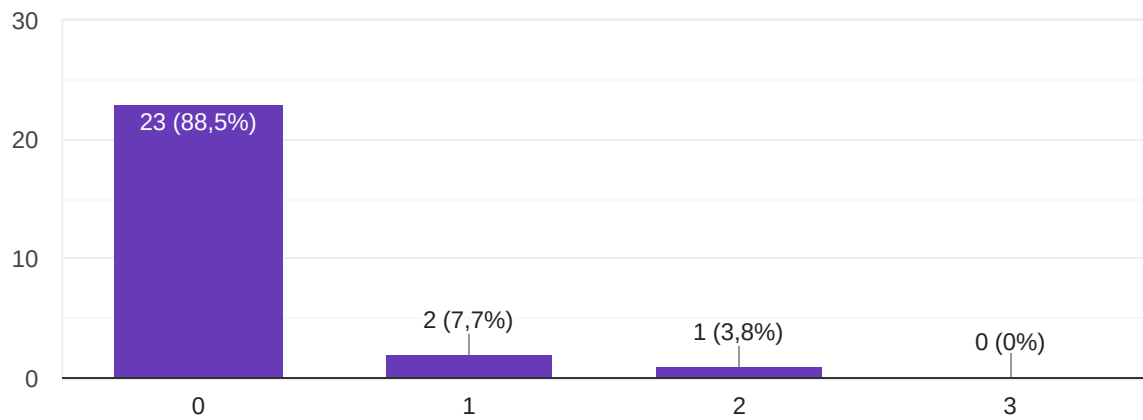

11. How relevant is the following code to the query "max*" with arguments type: "int" and return type "int".

26 respostas

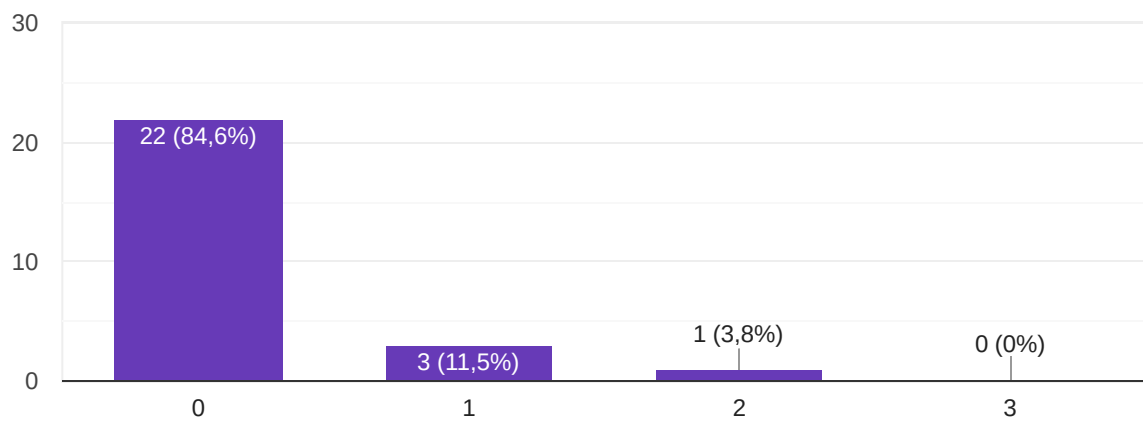

12. How relevant is the following code to the query "max*" with arguments type: "int" and return type "int".

26 respostas

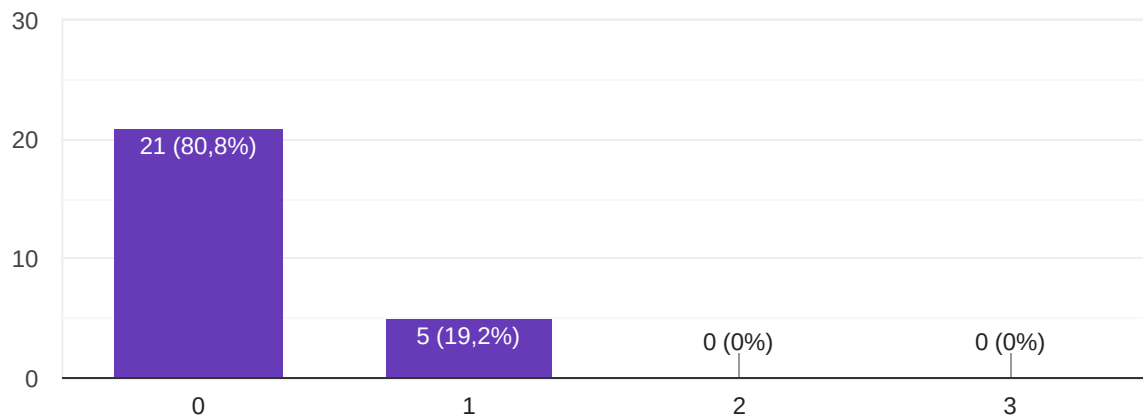

13. How relevant is the following code to the query "max*" with arguments type: "int" and return type "int".

26 respostas

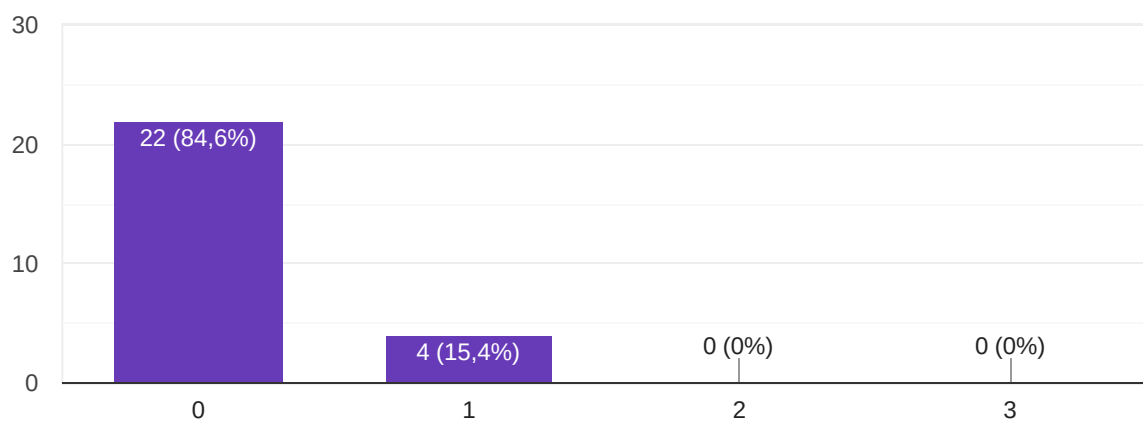

14. How relevant is the following code to the query "max*" with arguments type: "int" and return type "int".

26 respostas

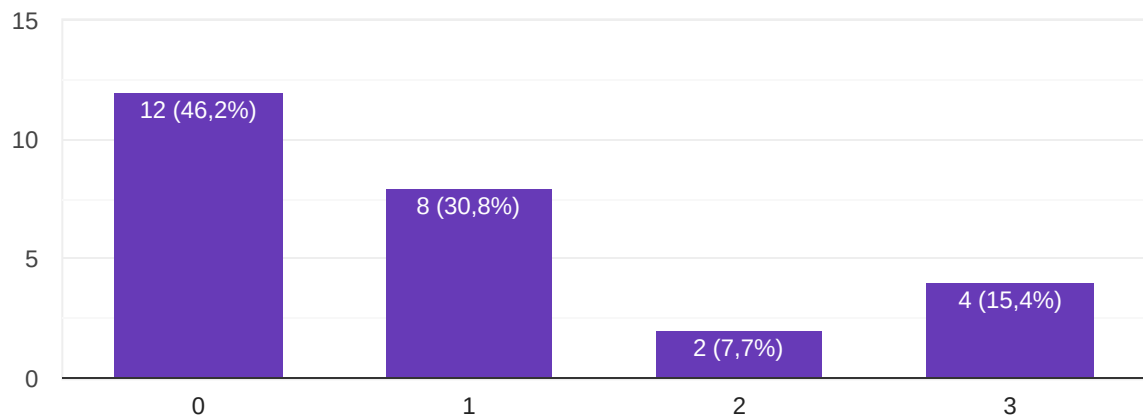

15. How relevant is the following code to the query "max*" with arguments type: "int" and return type "int".

26 respostas

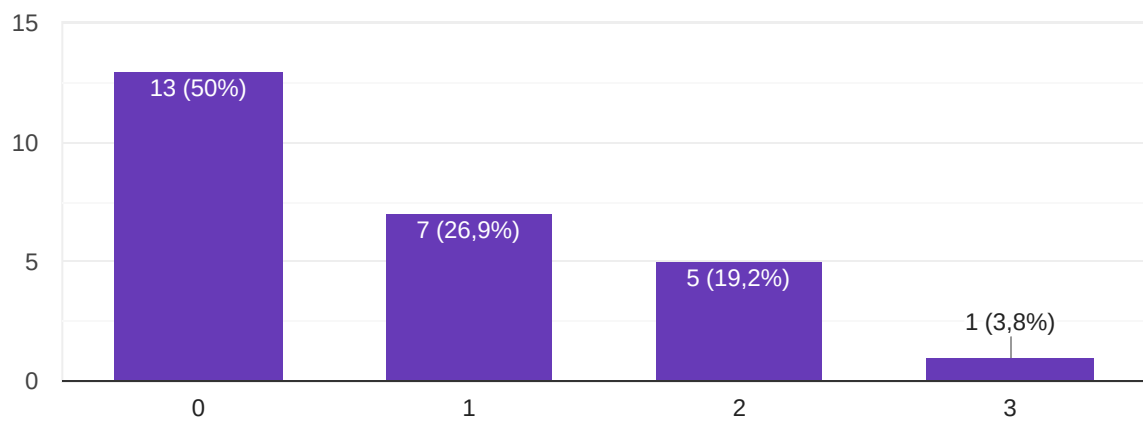

16. How relevant is the following code to the query "max*" with arguments type: "int" and return type "int".

26 respostas

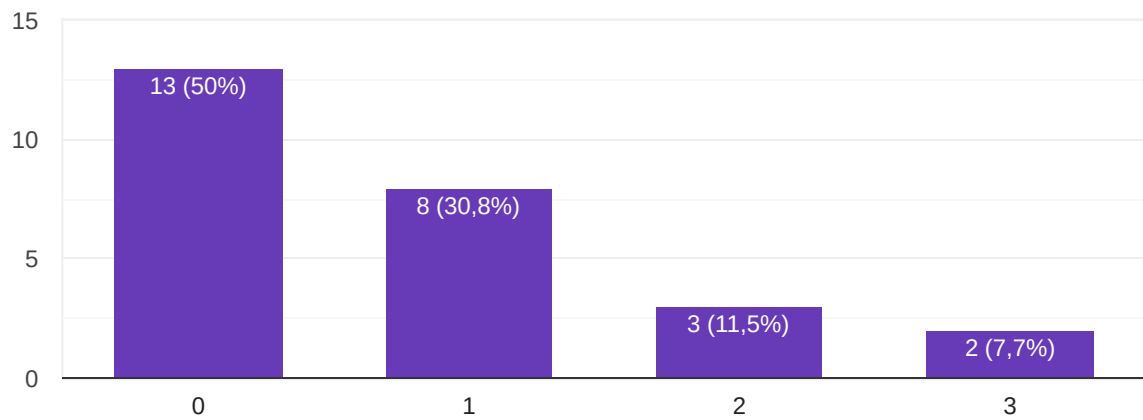

17. How relevant is the following code to the query "max*" with arguments type: "int" and return type "int".

26 respostas

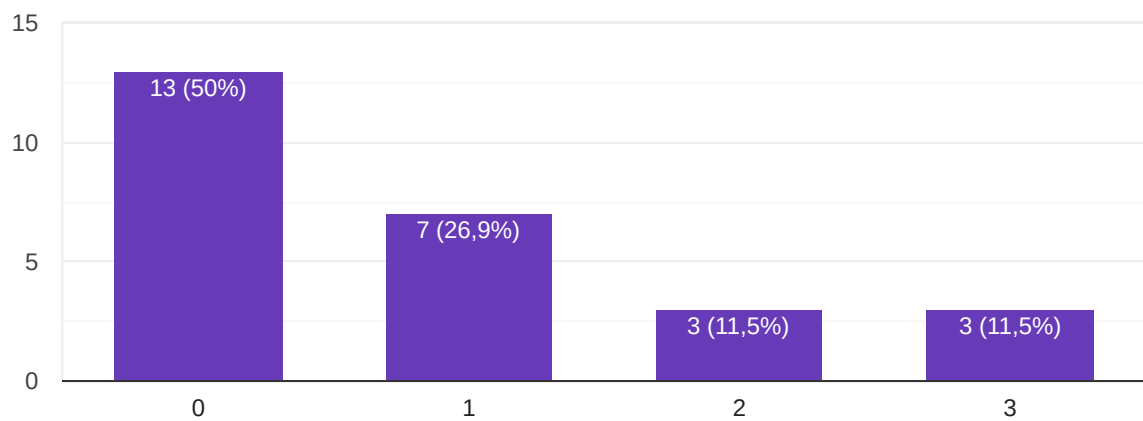

18. How relevant is the following code to the query "max*" with arguments type: "int" and return type "int".

26 respostas

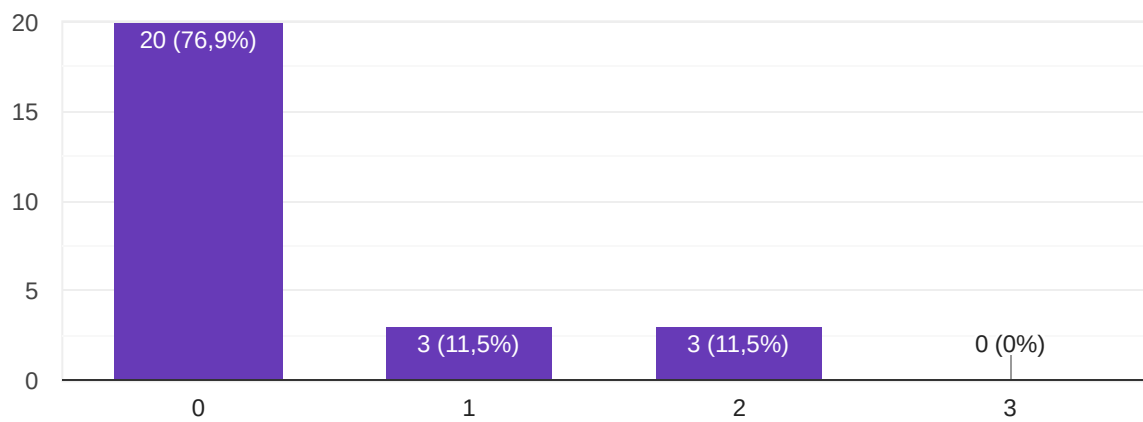

19. How relevant is the following code to the query "max*" with arguments type: "int" and return type "int".

26 respostas

20. How relevant is the following code to the query "max*" with arguments type: "int" and return type "int".
